enabling forensic-grade surveillance™

Intelligent Video Analytics Server

The AI68T is optimized for Analytic/Machine Learning Video Surveillance applications. The AI68 comes fully integrated and tested with industry leading video analytic software, offering a turnkey platform for Artificial Intelligence, Machine Learning and Heuristic Analytic applications.

Applications

- Facial Recognition
- Low cost
- Low camera quantity projects

Features:

- **Up to 6x Nvidia Graphics Cards**
- **2x Intel Xeon Scalable CPU**
- **Up to 384GB DDR4 RAM**

The **Graphic Processing Unit (GPU)** is optimized for the video analytics market. It delivers the performance required for the most demanding megapixel installations.

Multiple CPU and GPU configurations available to create the most efficient and cost-effective analytics solutions.

Powerful server built around dual high-performance Intel® Xeon® Scalable processors.

Purpose-built open platform to integrate Video Management Software, and Video Analytic Software Providers. All major supported Video Analytic Software providers are prequalified. More are continually added to ensure the widest possible certification coverage.

Effortless installation, management and administration along with advance RAID
